PROJECTS

World Weather | Solo Project

Frontend | 1 week | Live | Github

- *Responsive dashboard to track weather and local time in your choice of cities around the world.*
- *Built using React, JavaScript, HTML, and CSS using various APIs for data (WeatherAPI.com, Unsplash, Geolocation, and Webstorage).*

Trakr. | Group Project

Fullstack | 1 week | Live | Github

- *Job tracker to organize jobs you are interested in and track where you are in the application and interview process with the ability to save key points of contact, and specific required skills for the job*
- *Full MERN stack with Express API backend deployed to Heroku with Mongoose ODM and MongoDB Atlas. React frontend with React-router-dom routing, and React-bootstrap for responsive and accessible design.*
- *I worked as the project owner. Team followed Agile, and CI/CD development principles using feature branch/gitflow workflow.*

DiveFriendsBonaire.com | Dive Friends Bonaire

Frontend | 3 weeks | Archive

- *Designed a fully responsive and dynamic site with a focus on ease of content creation and SEO.*
- *Created a custom design with HTML, CSS, and PHP running on a Wordpress backend and MySQL database.*
- *Achieved top rank in google search results for several key search terms.*

ReefStoreBonaire.com | Reef Store Bonaire

Frontend | 1 week | Live

- *Created a single page site for Reef brand shoe/clothing store on Bonaire.*
- *Integrated Image carousel, google maps, and email contact form.*

DEVELOPMENT EXPERIENCE

Full Stack Developer

Dive Friends Bonaire   2015-2017

- *Redesigned an unresponsive table based website with static html into a fully responsive and dynamic site with a focus on ease of content creation and SEO.*
- *Achieved top rank in google search results for several key industry search terms.*
- *Dramatically increased page views and bookings through the website.*

Wordpress Developer

Amibug Group LLC   2012

- *Worked with a graphic designer to build and deploy customized wordpress sites for the 11 businesses operating under Amibug Group LLC.*
- *Launched 6 custom full content websites in under 3 months.*

Full Stack Developer

OPSGEAR   2006-2007

- *Designed and implemented a custom support ticket tracking system in PHP which dramatically increased CSR productivity and eliminated customer missed customer support emails.*
- *Built and integrated a product review application using HTML, CSS and PHP that could be embedded into a 3rd party hosted e-commerce site which only allowed limited HTML and Javascript code in a product page template increasing customer time on page and sales.*
- *Converted mockups from graphic designer into full dynamic web sites using HTML, CSS, and JavaScript.*

RECENT WORK EXPERIENCE

Scuba Instructor | Manager | Cave/Cavern Guide | Equipment Repair Technician | Boat Captain

Tank-Ha Dive Center / Blue Life / Dive Friends Bonaire / Utila Dive Center   2013-2022

- *Trained and mentored instructor candidates who then went on to pass their instructor examinations with 100% pass rate.*
- *Guided over 10,000 divers in extreme environments with no diver injuries. Reduced risk by strictly following safety procedures, giving thorough safety briefings, supervision, and quick response.*
- *Serviced and repaired vital life support equipment and implemented a regularly scheduled checklist to assure emergency equipment was complete and functioning.*
- *Taught all levels of diver courses and certified over 800 divers.*
